SUMMARY

Full-stack developer with a focus on clean design and efficient engineering. I build responsive, scalable, and secure web and mobile applications—primarily for healthcare and SaaS businesses. My core stack includes React, Next.js, and Tailwind CSS. I turn ideas into high-impact digital products.

PROJECTS & EXPERIENCE

Fullstack Developer

Oct 2024 - Present, Remote

SOULTWARE LLC

- Built and launched full-scale web and mobile apps for clients in healthcare, food services, and coaching.
- Developed a custom WordPress plugin with visual progress tracking and photo comparison for fitness clients.
- Created and deployed responsive websites with integrated shopping carts and booking systems.
- Designed internal tools and dashboards to streamline client operations and improve data visibility.
- Managed full project lifecycle from planning and prototyping to deployment and ongoing support.

Frontend Developer with Backend Experience

Jun 2024 - Present, Remote

Robin Reach TLD

- Rebuilt the responsive marketing site from Figma, improving engagement (+40%) and reducing bounce rate (−25%).
- Converted UI designs into `.erb` templates with theme switching (dark/light), boosting accessibility by 35%.
- Led redesign of the dashboard app, increasing DAUs by 30% and improving onboarding time by 20%.
- Built 5+ major frontend features; enhanced UX with animations and reduced load time by 45%.

Frontend and Backend Code Reviewer

Apr 2022 - Dec 2023, Remote

Microverse

- Reviewed 1,500+ full-stack projects, focusing on best practices in React, Angular, and UI/UX.
- Helped over 1,490 developers improve code quality and project structure through detailed feedback.
- Validated API integrations in 320+ capstones (React + Ruby on Rails), ensuring production readiness.
- Maintained cross-browser and device compatibility for global web applications.

EDUCATION

Software Engineering

Dec 2023 - Sep 2024

1337 Coding School

Full-Stack Web Development (Remote Certificate Program)

Jan 2022 - Jan 2023

Microverse
